

Simplified Maintenance I & II

2004 & Newer Cars & Trucks

With Gasoline Engines & With GM Oil Life System (OLS)

Required services are described by the terms Maintenance I & II. Use Maintenance I if the Change Engine Oil light comes on within 10 months of the vehicle purchase or when Maintenance II was the last service performed.

The first service should be Maintenance I; the second should be Maintenance II. Alternate between the two schedules thereafter. Depending upon your driving habits, Maintenance II may be required more often. Refer to your Owner's Manual for specific maintenance requirements.

Notice: It is important to check your engine oil regularly and keep it at the proper level. Failure to maintain proper oil level can result in expensive engine repairs not covered by the vehicle warranty.

It is important to regularly check your tires for wear and proper inflation. Failure to maintain properly inflated tires can result in premature tire wear, vehicle damage, or personal injury. Please see dealer for pricing.

Green Chevrolet Hummer is here for all your maintenance needs from oil changes to tires to routine maintenance or even the unforeseen major repair. Please call our service department with any questions or for pricing information on servicing your particular vehicle.

Remember that routine maintenance goes beyond oil changes. Please look inside this maintenance menu for a schedule that we have developed, considering local climate and driving conditions, to help keep your vehicle in top performance and enhance the driving pleasure of your car or truck.

Green Chevrolet Hummer's recommended Scheduled Maintenance Services, are based on our extensive automotive repair and service experience, with consideration for the local climate and "stop & go" driving conditions.

Your service advisor is the best source for answering questions about your maintenance needs.

MAINTENANCE I \$95.95

- Change Engine Oil & Filter / Reset Oil Life System
- Visually Check For Any Leaks Or Damage
